CARD ADMINISTRATION MODULE (CAM)

The card administration module from Banqsoft (CAM) supports the complete lifecycle of card issuing. The solution is seamless integrated with View21's account ledgers and credit engine and delivered as a highly automated and managed service.

The card module consists of a ledger, online customer onboarding including KYC, FATCA, AML, eID, eSignature, credit- and risk processes, risk-based pricing, card ordering, production process, PCI compliance, PIN services, card renewals, STIP and clearing, settlements, rewards, cashback, cashpoints, invoicing,

payments, dispute handling, dunning and pre-collection, customer statements and reporting. Issuing services handled by 3rdparty (e.g. Nets) is fully integrated with View21.

The module support major existing and upcoming payment schemes with different token technology.

Flexible pricing methods makes it possible to customize card products to specific market segments. Multiple credit applications can be handled simultaneously on the internet or mobile bank, where the customer also can administrate their own PIN codes.
